

Bill Pay is getting even better.

We're upgrading the experience to make managing payments more convenient than ever.

What's Coming:

Here is a breakdown of what you can expect to see mid-October 2025.

- A simpler, smarter, more streamlined bill pay solution with an intuitive design.
- Changes to your profile or bank account information will be made through your online banking profile.
- Activate one bill at a time through a simple activation process.
- A search feature has been added to the home page to locate a specific biller quickly.
- eBills and reminders will be in a prominent Unpaid Bills section. Other billers will be arranged by user activity in the My Billers section.
- When you make an update to a biller for which a payment is pending, the change is automatically applied to the pending payment.
- A new biller is automatically assigned to a category when added and the option to create custom categories is no longer available.
